4. Acceptance of Brick Sidewalks Policy

City Manager Bohenko reported over the course of the past six to eight years, sidewalks located within the Historic District have been constructed with brick when sidewalk improvements are carried out. A map depicting the boundaries of the Historic District has been provided for your reference. As you know, with the recent passage of the revised Zoning Ordinance, the Historic District was expanded down Islington Street to Jewell Court/Bartlett Street; down Lafayette Road to South Street; and on Hanover Street between Bridge Street and Vaughan Mall. He advised the City Council that staff recommends that sidewalks within these new Historic District areas should also be brick with the exception of Islington Street, as well as New Castle Avenue east of Marcy Street.

City Manager Bohenko said one issue that arises is when parcels within the Historic District front on a side street, the majority of which is not within the District (for example along Middle Street). In these cases, the approach has been to be consistent with the sidewalk material used along the majority of the side street. The second issue that arises has to do with sidewalks located outside the Historic District that have historically been brick. Past practice with regard to these sidewalks has been determined through a separate vote of the City Council. When upgrades are made to other sidewalks in the City, concrete is used with black asphalt being replaced with concrete.

Assistant Mayor Novelline Clayburgh moved to accept the Brick Sidewalks Policy, as presented. Seconded by Councilor Dwyer.

Councilor Coviello said he does not agree with the policy and it would increase the areas therefore, he would vote against the motion.
