The August 3, 2017, Parking and Traffic Safety Committee meeting has been cancelled due to a lack of emergent action items. A brief summary of the status of current action items are noted below:

**Neighborhood Traffic Calming Program:** At the November PTS meeting, a presentation was provided to the PTS Committee regarding a variety of traffic calming measures that the City staff are considering in the development of a neighborhood traffic calming guidance program. Staff is working to develop a public request form and to get the program information on the City’s Transportation website.

**Rick Chellman Parking Suggestions:** At the January PTS meeting, Rick Chellman made a presentation on ways to add on-street parking spaces in the downtown area. Staff is reviewing the new suggestions and will be reporting back on their feasibility and possible implementation at a later date.

**Crosswalk Inventory:** At the June PTS meeting, a request was made to create an inventory of existing crosswalks and in-street pedestrian warning signs. City staff is working to compile this information.
Middle Street, Summer Street and Miller Avenue intersection: At the July PTS meeting, concerns were raised regarding the pedestrian safety and operations of this signalized intersection. Traffic cameras have been placed at this location and staff is reviewing the data to determine appropriate actions and recommendations for crosswalks, right turns on red, and signal operation.

Islington Street crosswalk at Albany Street: City staff continues to monitor traffic operations and pedestrian usage of the temporary crosswalk and bump-out at the Albany Street intersection. The monitoring will continue through the peak traffic season. Once the monitoring is completed, a report back will be provided to the Committee.

The next PTS Committee meeting is scheduled for September 7, 2017.
