1. Terry Desmarais brought the comm. up to date on the plant construction and schedule to be operational and the hopeful completion date of Sept. 2020. He also discussed a new project. The replacement of the existing water line from the bridge to theater end. The city of Newcastle is also working to replace sewer and water line that runs from the road to the island. We also were told that the area where the gravel parking lot is will be raised 2 feet.

2. The comm. discussed bring a trail from the new access road down to the beach area and installing a granite look out or installing benches.
