NH & Rockingham County Cases by Week

NH Hospitalizations & Portsmouth Resident Cases

Data and graphs above show are in a new format as the Covid Tracking Project has now merged with the Covid Act Now data tracker that combines data reported by the CDC and the states. For more: <https://covidactnow.org/?s=1488444>

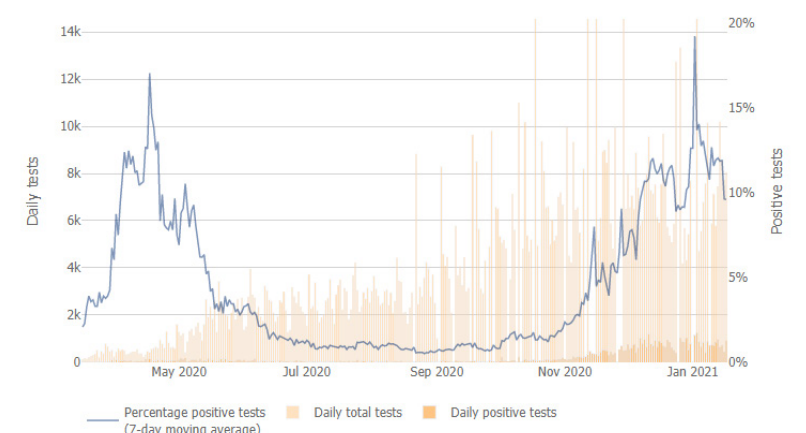

New Hampshire announced **0** cases for January 18. There were an average of **485** cases per day over the most recent 7-day period (January 12 to January 18). This is a **41%** decrease compared to the previous 7-day period.

56,864 Total Cases	957 Total Hosp.	6.8% 7-Day Test Positivity	49,544 Total Recovered
6,387 Active Cases	253 Current Hosp.	9,265 Avg. Daily Tests	933 Total Deaths

Total Deaths by Age

Daily Trend for New Cases

New Cases per 100k over 14 days

The graph above shows the total daily number of COVID-19 tests reported in NH, and of those tests, how many were positive each day. The trend line in blue shows the average percentage of tests that were positive over the last 7 days.

Note: DHHS changed the map above to show the number of new cases per 100k people over the last 14 days to create shading gradients between counties
