

Vaccination Information for Employees

The State of NH is following a phased vaccine rollout. The following represents the most up-to-date information regarding vaccine phasing. The vaccine registration site will be updated daily, continue to refer to the link below for additional information as it becomes available.

Please refer to the following interactive link to see where you fall in the phasing and to sign up when registration opens to your phase: <https://www.vaccines.nh.gov/>

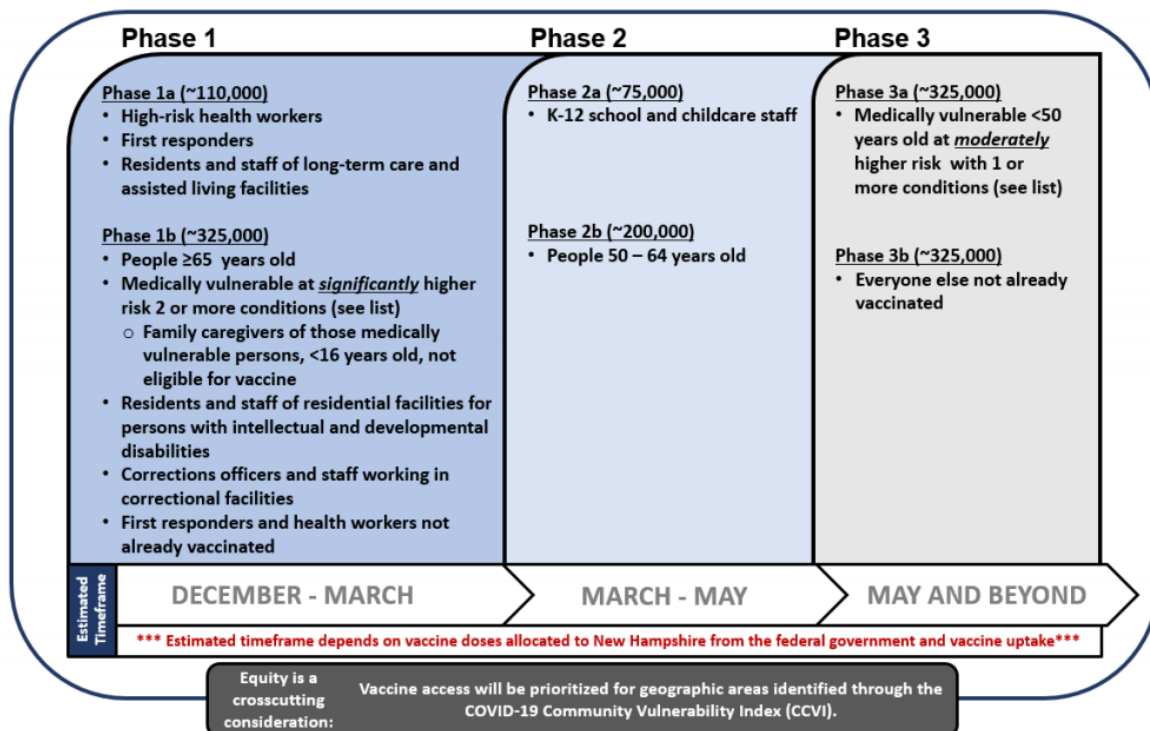

Registration for Phase 1B begins on January 22, 2021. Phase 1B includes those aged 65 and over, people with two or more of the medical conditions listed in the chart below and caregivers of medically vulnerable children younger than 16 (Children under the age of 16 are not eligible for vaccine. Studies in this population are underway).

- For clarification on whether you will need your physician's confirmation of qualifying medical conditions for vaccination at this Phase, please refer back to the above link frequently for additional direction from the State. This information has not been finalized yet.

For residents who do not have internet access, please call 2-1-1 for assistance with registration beginning January 22.

For employees who live out-of-state, the most up-to-date information is that you will be able to register for and receive your vaccine in NH. Please refer to the link above to begin that process and/or keep abreast of updates.

New Hampshire COVID-19 Vaccination Allocation Plan Summary January 14, 2021

List Underlying Medical Conditions (adapted from CDC):

Phase 1b: Two or more conditions

Phase 3a: One or more conditions

- Cancer
- Chronic Kidney Disease
- COPD (Chronic Obstructive Pulmonary Disease)
- Down Syndrome
- Heart Conditions, such as heart failure, coronary artery disease, or cardiomyopathies
- Immunocompromised state (weakened immune system) from solid organ transplant
- Obesity (body mass index of 30 kg/m or higher but <40 kg/m)
- Other High-Risk Pulmonary Disease
- Pregnancy
- Severe Obesity (body >40 kg/m)
- Sickle cell disease
- Type 2 Diabetes Mellitus

It remains possible that people who are fully vaccinated or previously infected could still acquire asymptomatic SARS-CoV-2 infection, or attenuated (milder) COVID-19. Therefore, even people who are fully vaccinated or previously infected need to continue to practice physical distancing, avoid social groups and gatherings, and wear face masks at all times when in public places and facilities.

Updated Quarantine Information:

After closed-contact with a person infected with Covid-19, the following individuals DO NOT need to Quarantine:

- Vaccinated individuals 14 days or later from the receipt of the second dose of the vaccine; and
- Persons who received a positive COVID-19 test within the last 90 days;

However, if the individual experiences new or unexplained symptoms of COVID-19, then they must Quarantine and seek testing.

Vaccination and post-infection DO NOT lift travel restrictions. Avoid all non-essential travel until further notice.
