

**Addendum #1**  
**RFP #06-22 – Snow Removal Services**  
**Issued Sept. 30, 2021**

**General**

1. Little Harbour School (Clough Drive): Is that maintained by the city or the snow plow contractor for snow plow services?

The school department maintains snow removal and salting of Clough Drive from South Street to the stop sign at Brackett Street. The city does salt the road as part of their salt route during black ice or a light covering of snow.

2. Middle School (Parrott Ave): Can we get a map of the boundary lines? There seems to be a few smaller parking areas connected to the school and we want to be sure we account for all areas included in that scope of work.

**Portsmouth Middle School**

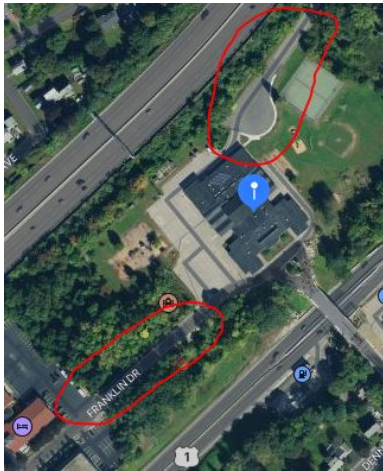

The orange line is usually the boundary line between the library lot and the school lot. The yellow line is where the school department conducts snow removal for parent and bus drop off. The school

department will salt the library parking lot if they see that it needs it while their salting their lots. Especially the 4 parking spots that are designated for the school department.

The city will plow and salt the library lot. The two circle areas is where the city piles the snow and will hall out during snow removal.

3. New Franklin School (Franklin Drive): Please see attached photo. Are the areas circled in red included in the scope of work?

Yes, the areas in red are in the scope of work for the schools. However, the city's side walk tractors will maintain the sidewalks down between the hotels and over the bridge. We don't have a side walk tractor as part of our equipment inventory.

4. High School (Andrew Jarvis Drive): Can we get a map of the boundary lines? There seems to be a few areas in question as well.

## Portsmouth High School

The school department maintains Andrew Jarvis to the gate on Summit Ave and the sidewalk down Andrew Jarvis. The city's side walk tractor does Summit Ave from the gate to South Street.
