Addendum #4
Bid #44-14

South Dock Replacement – Prescott Park

This addendum forms part of the original document marked: Bid#44-14 South Dock Replacement – Prescott Park.

The following question has been asked and answered:

Question: Addendum No. 3 contains a revised drawing E-101 and we have noted that on the original drawing E-101 there was a note in the lower right hand corner that specified that this was “BID OPTION #2” however the revised drawing doesn’t contain the same note? Does this mean that this electrical is now considered part of the base bid package or does it still fall under the Bid Option No. 2?

Answer: Yes, the electrical still falls under Bid Option No. 2.

The following is a clarification on the permit language:

- Based on information provided and re-review of the application materials, DES grants relief from Wetlands Permit Condition #9 which states “the decking of the dock shall have $\frac{3}{4}$ - inch spacing between the decking planks.” DES understands the replacement structure will be concrete floating docks as stated in the original application.

Please acknowledge this addendum within your proposal, failure to do so may subject a bidder to disqualification.

End of Addendum #4
