

Friday, August 16, 2024

Dear Historic District Commission,

We are writing to request your approval for proposed renovations to our home at 491 Marcy Street, located within the Historic District. We purchased our home in 2023 and have found that significant repairs are needed to preserve its architectural and historic character, in line with the Historic District Ordinance, and to maintain the property's value.

City records indicate that our home dates back to 1750, though the Portsmouth Historical Survey (1982-83) estimated c.1820. Our own research has traced its history to at least the 1840s through property deeds and materials from the Portsmouth Athenaeum and other sources. Over the centuries, the house has undergone various renovations and structural changes, including the removal of its center chimney stack (now only visible from the dirt-floor basement and in the original wide plank floors where fireplaces once stood), a two-storey extension at the rear to accommodate two-family living, and extensive fire damage to the attic, making it uninhabitable. While the windows show signs of significant age, none are thought to be original. The facade has also seen several modifications, such as the replacement of wide plank siding with narrow cedar plank siding at the front and vinyl siding on the sides and rear. A new roof was added shortly before we purchased the home, but due to poor installation, the roof leaks and requires immediate replacement.

Our renovation proposal includes the full replacement of all windows with new construction windows and historic sills, the complete replacement of all siding and trim work, the installation of new gutters, and the addition of a new asphalt roof with four skylights at the rear of the property. We plan to install fiberglass Marvin Elevate windows throughout the house, a choice widely embraced by homeowners within Portsmouth's Historic District. For the siding, we propose using smooth plank siding made of fiber cement, produced by James Hardie. This material meets the criteria outlined in the updated Preservation Brief 16 (September 2023) by the National Park Service and the Secretary of the Interior. It is recognized for its enhanced resiliency, sustainability, aesthetics, affordability, and low maintenance requirements. Several local historic district commissions have approved fiber cement siding as an appropriate substitute material, noting its indistinguishable appearance from traditional wood siding. The proposed skylights are produced by Velux, and the proposed replacement storm doors are produced by Andersen.

491 Marcy Street is our forever home, where we hope to raise a family close to our loved ones in the Seacoast. We see ourselves as stewards of this historic property and recognize that the home is long overdue for external upgrades to ensure its structural integrity for generations to come. Currently, our home is one of the few in the Historic District with vinyl siding. The windows are in poor condition: none open safely due to missing or broken hardware, several panes are cracked or missing, and most have rotting sills and trim. Additionally, the storm windows are damaged, missing parts, and inoperable. The roof at the rear leaks during heavy rain, and the front portion is fully depreciated, necessitating the replacement of all shingles and drip edge. Gutters are missing in several areas, causing water to cascade down the front and rear of the home during storms. The cornice returns and other trim work are severely damaged, and in some cases, missing entirely. The siding, both vinyl and cedar, is significantly damaged on all sides.

We request your approval to proceed with these essential renovations to preserve and protect our home.

With appreciation and gratitude,

Charlie Barlow and Sean Conroy, homeowners of 491 Marcy Street

SUPPORTING DOCUMENTS

491 MARCY STREET

Documentation of Board of Adjustment approvals as needed

We have submitted both a Land Use Application and Building Permit Application for our renovation project.

Photographs of all facades which relate to proposed changes

The pages that follow include captioned photographs of all facades and details of current conditions.

Site plan

Our renovation project does not involve changes to the footprint of our home. We have included a copy of the tax map for 491 Marcy Street.

Specifications for windows and doors

We will install new construction windows, including 24 double-hung windows and two casement windows (upstairs bath/rear porch). The dimensions of each window are listed on the building elevations. All new construction windows will be installed in the same locations as existing windows. Historical sills will be installed throughout.

All existing windows will be replaced with the same grid configuration, using simulated divided lites with spacer bars. Generally, the oldest front portion of the house is glazed with six-over-clear windows, while the newer rear portion is glazed with two-over-clear windows. There is one two-over-two window that we propose is replaced with a new two-over-clear window to match the other windows on the rear portion of our home. Windows will feature aluminum screens. Existing storm windows (all damaged) will be removed and not reinstalled. We will not install new storm windows.

All new construction windows will be Marvin Elevate windows, made of fiberglass exteriors and wood interiors.

We will install four Velux VCM Manual “Fresh Air” Curb-Mounted Skylights at the rear of our home, as shown in the elevations. These are constructed with aluminum frames. These skylights will not be visible from the front of our home on Marcy Street.

We will replace the two storm doors at the rear of our home with Andersen 10 Series storm doors. These doors are made with a thick aluminum frame and clear glass.

Copies of the manufacturers’ info sheets and brochures are enclosed with supporting materials in the subsequent section.

SDL with spacer bars in Marvin Elevate windows

Historic sill option

Materials to be used

We will be using the following materials for our renovation project:

Asphalt Roof: Timberline HDZ® Shingles or Owens Corning TruDefinition Duration Shingle

Windows: Marvin Elevate

Skylights: Velux VCM Manual “Fresh Air” Curb-Mounted Skylight

Siding: James Hardie Siding, Smooth Plank, with 4” exposures

Sills and Trim: Composite, to match existing including cornice returns

Gutters: Aluminum 5” seamless

Manufacturers’ info sheets and brochures are enclosed where available. We have also enclosed a presentation on approved fiber cement substitute for wood siding in historic districts to support our material selection for the replacement siding.

Building Elevations

Building elevations reflect existing conditions and proposed changes to the exterior of our home. No demolition will occur to the structure of our home and the footprint and facade will remain unchanged in its dimensions. The elevations include accurate dimensions of all proposed changes to the exterior and architectural detailing.

Marvin Elevate® collection

THE PERFECT BALANCE OF BEAUTY AND STRENGTH

Balancing beautiful design with superior strength, the Marvin Elevate collection delivers style in any climate. Elevate features warm wood interiors that can blend in or stand out with Ultrex® fiberglass exteriors for lasting durability. The collection offers a range of carefully selected features and options, making it as versatile as it is elegant.

About Us

At Marvin, we're driven to imagine and create better ways of living, helping people feel happier and healthier inside their homes. We believe that our work isn't just about designing better windows and doors—it's about opening new possibilities for the people who use them.

WHY MATERIALS MATTER

THE MARVIN MATERIALS DIFFERENCE: ULTREX® FIBERGLASS

Choosing the right materials for windows and doors is important when it comes to long-term appearance and performance. Ultrex, an innovative fiberglass material pioneered by Marvin over 25 years ago, was one of the first premium composites on the market. However, not all composites are created equal.

Some companies use materials with fundamentally different properties and performance values to produce a composite material. But, Ultrex is different. High density woven fibers bound by a thermally-set resin makes Ultrex more resistant to pressure and temperature than vinyl-based composites. With such different materials grouped in the composites category, it becomes important to know what sets them apart.

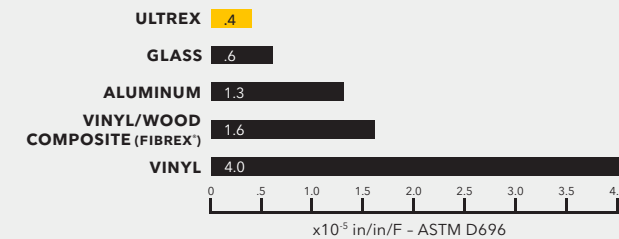

TEMPERATURES MAY FLUCTUATE, BUT ULTREX FIBERGLASS WON'T

Ultrex expands and contracts at virtually the same rate as glass, so it works with glass rather than against it. This means seals aren't as prone to leaking, and windows aren't subjected to sagging issues like other composites.

This is especially true when compared to vinyl, which can distort in extreme heat and crack in fluctuating temperatures. Ultrex resists distortion even at temperatures up to 285°F. Rapid temperature change doesn't phase Ultrex. From -30°F to 70°F, a 6-foot stile changes less than 1/32 inch in length.

EXPANSION MEASUREMENT

Ultrex expands and contracts at virtually the same rate as glass.

INDUSTRY'S BEST FIBERGLASS FINISH FOR LASTING BEAUTY

Ultrex is the first and only fiberglass finish to be verified to AAMA's 624 voluntary finish specifications for fiber reinforced thermoset profiles (fiberglass).

Windows and doors made with Ultrex resist scratches, dings, and marring more than vinyl. Our proprietary, mechanically bonded acrylic finish is up to three times thicker than painted competitive finishes, and it resists UV degradation up to five times longer than vinyl—even on dark colors.

ACRYLIC CAP

STRENGTH AND STABILITY OF ULTREX

Ultrex pultruded fiberglass has a tensile strength 8x stronger than vinyl and 3x stronger than non-fiberglass vinyl/wood composites. Windows and doors made with Ultrex bend and flex less, resist cracking and separating, and stand up better to everyday wear and tear.

The exceptional strength and stability of Ultrex eases installation and establishes a secure, long-lasting fit that stays square and true, year after year.

Casement and Direct Glaze windows in Stone White

COOLER IN SUMMER, WARMER IN WINTER

TOP RATED ENERGY EFFICIENCY

The National Fenestration Rating Council (NFRC) defines energy performance ratings for the entire window and door industry. It rates:

- **U-factor:** How well a window keeps heat inside a building.
- **Solar heat gain:** A window's ability to block warming caused by sunlight.
- **Visible light transmittance:** How much light gets through a product.
- **Air leakage:** Heat loss and gain by air infiltration through cracks in the window assembly.

Ultrax® fiberglass is 500 times less conductive than roll form aluminum, similar to wood and PVC. It provides an insulated barrier against extreme weather temperatures, keeping homes comfortable, and reducing heating and cooling costs.

ENERGY COST SAVINGS

Marvin was the first major window and door manufacturer to offer energy-efficient Low E2 glass and ENERGY STAR® certified performance on all of our standard windows and doors. Compared to non-certified products, ENERGY STAR certified windows and doors cut heating and cooling costs by 12%.*

The Elevate collection offers Triple-pane, Low E1, Low E2, Low E3, and Low E3/ERS insulated glass with argon gas, which has thermal conductivity 30% lower than that of air. It adds improved solar and thermal protection by distinguishing between visible light, damaging UV, and near-infrared rays to offer the ultimate glass performance. And provides a selection of energy-efficient solutions depending on your climate and needs.

LOW E GLASS COATING

The Low E coating is specially designed to take advantage of the angle of the winter and summer sun. Winter sun is absorbed and conducted indoors. Summer sun is filtered and reflected back outdoors.

A MORE COMFORTABLE INTERIOR, REGARDLESS OF THE SEASON

Keep heat inside during cooler weather and block the sun's rays during warmer weather with dual-pane windows and Low E coating.

DESIGNED WITH PROS IN MIND

PEACE OF MIND

Every project has its own unique requirements and Marvin is equipped to meet those challenges. Our unique Ultrex® fiberglass construction, available factory services, unmatched delivery, and network of dedicated service and support personnel make the Elevate collection the perfect choice—no matter the project.

EASY TO ORDER, SIMPLE TO INSTALL

The Elevate collection offers simplified options to make the order process straightforward. Installation options and accessories make installing Marvin easier than ever. See page 20 for more information.

MARVIN HAS YOU COVERED

The Elevate collection is backed by a fully transferable 20/10 warranty: 20-year coverage on glass, and 10-year coverage on manufacturing materials and workmanship.

CREATING VALUE AND EFFICIENCY EVERY STEP OF THE WAY

Weather-tight, solid, and durable Ultrex® fiberglass means there are virtually no call-backs. Elevate window and door profiles are optimized for the maximum in performance and fit.

INSTALLATION OPTIONS AND ACCESSORIES

1. NAILING FIN

Pre-attached folding nailing fin and drip cap for easier installation.

2. THROUGH JAMB

Available through jamb and installation bracket options.

3. FACTORY-APPLIED JAMB EXTENSIONS

Factory-applied jamb extensions save time and labor. We supply 4 7/16", 6 7/16", and 6 13/16" jamb depth in bare wood, white, designer black, or clear interior finish.

4. FACTORY-INSTALLED SCREENS

Factory-installed screens are a standard offering with operating windows. At no extra cost, we can ship your screens separately to reduce on-site damage prior to installation.

5. FACTORY MULLED ASSEMBLIES

Available standard factory mulling, reinforced factory mulling, or field mulling kits. The reinforced mull meets AAMA 450 specifications and performs up to PG50 on standard products and up to PG55 on IZ3 rated products.

6. CORNER KEYS

Integral corner keys keeps window and door units square and corners sealed.

7. CUSTOM SIZES

Custom sizes are available on windows and doors in 1/4" increments for the perfect fit every time.

8. PAINTABLE ULTREX EXTERIOR

The Ultrex® fiberglass exterior is paintable, and it holds dark colors better than vinyl or vinyl/wood composites.

EXTERIOR TRIM

Ultrex Exterior Trim is offered with all rectangular Elevate products in all six exterior finishes. The durability, performance, and look of Marvin Elevate windows and doors can be extended to the trim.

BRICK MOULD

2" Brick Mould is available with or without 2 1/8" sill nosing.

FLAT

3 1/2" Flat Trim is available in Flat and Flat Ranch configurations with or without 2 1/8" sill nosing.

SILL NOSE

2 1/8" Sill Nose provides authentic sill appearance.

CONNECTION BARB

Barb and receiver attachment method provides for quick, secure installation.

DESIGN OPTIONS

INTERIOR AND EXTERIOR FINISHES

Elevate windows and doors features rich pine interiors and a durable, strong, and fully paintable Ultrex® fiberglass exterior, featuring our AAMA-verified acrylic finish for low-maintenance and superior aesthetics. Elevate Round Tops include the extruded aluminum exterior finished in commercial-grade paint for superior resistance to fading and chalking.

WOOD INTERIOR FINISHES

FIBERGLASS EXTERIOR COLORS

GLASS OPTIONS

Glass is available with Standard Dual Pane or optional Triple Pane on select products. Available with Low E1, Low E2, Low E3, and Low E3/ERS insulated glass with argon gas.* Options include glazing for sound abatement (STC/OITC), high altitudes, and California fire zones. Laminated glass is also offered in products designed specifically for hurricane zones.

DECORATIVE GLASS

DIVIDED LITES

GRILLES-BETWEEN-THE-GLASS (GBG)

Available in several popular lite cut options for a classic divided lite look and easy glass cleaning. Available in Stone White, Bronze, and Ebony interior and Stone White, Cashmere, Pebble Gray, Bronze, Gunmetal or Ebony exterior.*

SIMULATED DIVIDED LITE (SDL)

Bars permanently adhered to both sides of the glass for a more authentic look. Available with or without spacer bar and in several lite cut options.

GRILLES-BETWEEN-THE-GLASS

SIMULATED DIVIDED LITE

SIMULATED CHECKRAIL

Simulated Checkrail is the perfect solution when aesthetics call for the beauty of a double hung, but operation, egress, or performance demand another solution.

You specify placement of the horizontal simulated checkrail bar and the lite cut patterns above and below.

These illustrations offer a sampling of 7/8" Simulated Divided Lite (SDL) patterns that can be selected in combination with the 2 1/32" Simulated Checkrail on Casement, Awning, Glider, Direct Glaze Rectangle, Picture windows, and all Elevate doors.

* Not available in polygons except direct glaze rectangles.

* Argon gas not available in high elevations where capillary tubes are required.

HARDWARE STYLES

WINDOW HARDWARE

Windows feature classic low-profile durable hardware for clean aesthetics, safety, and security.

SASH LOCK + KEEPER
Double Hung and Glider

FOLDING HANDLE
Casement and Awning

Double Hung window in Designer Black with Matte Black Sash Lock + Keeper

DOOR HANDLES

Door handles are available in two distinct hardware styles.

CAMBRIDGE

NORTHFIELD

DOOR HANDLE OPTIONS

- Available keyed-alike option (use one key on multiple locks, with up to 3 different keys on each project).
- Choose a distinct interior and exterior handle finish that matches or complements the interior and exterior color of your door.

FINISHES

Choose from a variety of hardware finishes to complement your Elevate collection windows and doors.

The Physical Vapor Deposition (PVD) process adds a layer of toughness to hardware exposed to environmental factors like direct sun and humidity. PVD finishes resist fading and discoloration, even in coastal areas. PVD has the highest grade corrosion resistant finish.

PVD finish is available on exterior door hardware in Oil Rubbed Bronze, Satin Nickel, and Brass.

IZ3 PRODUCTS FOR COASTAL LIVING

Our Elevate IZ3 Certified products are specifically designed for the extreme conditions and construction requirements of coastal areas. Rigorously tested by third-party agencies to meet or exceed the most stringent coastal codes, they protect against flying debris, driving rain, cyclic pressure, and extreme temperatures. The Ultrex® fiberglass finish exceeds AAMA 624 standards for weathering and fading resistance.

IN HARSH COASTAL CONDITIONS,
YOUR WINDOWS AND DOORS MATTER

Marvin offers windows and doors specifically designed for the coast.

Sliding French door and Picture window in Designer Black

THE MARVIN ELEVATE®
COLLECTION IS AN IDEAL BLEND
OF REMARKABLE DESIGN AND
SUPERIOR STRENGTH.

Warm wood interiors add timeless beauty, while resilient, long-lasting Ultrex® fiberglass exteriors stand up to the toughest conditions, outperforming and outlasting vinyl, roll-form aluminum and other composites.

Double Hung and Casement windows in Pebble Gray

Since 1912, Marvin has been a family-owned and -led company, with a legacy of innovation and commitment to the highest quality. We understand the unique opportunity windows and doors have to improve our spaces and how we feel in them. That's why we never stop pushing what's possible and inventing new solutions to channel fresh air, enhance light quality, and connect with the world around us.

Details and Elevations not to scale.

Special sized units available within and outside of CN matrix. Please contact your Marvin dealer.

Minimum frame size: 17 1/2" x 27 3/4"
 Maximum frame size: 53 1/2" x 83 3/4"

Optional Double Hung GBGs and SDLs are available in a standard Rectangular cut shown. Other available lite cuts shown on page 3.

When ordering 6 9/16" (167 mm) or 6 13/16" (173 mm) jambs, add 1/4" (6 mm) to width and 1/8" (3 mm) to height for Rough Opening, Frame Size and Masonry Opening.

E = These windows meet National Egress Codes for fire evacuation. Local codes may differ.

Available in equal, cottage, and reverse cottage sash configurations. Cottage and reverse cottage sash configurations are not available below CN 36 height and above CN 68 height.

For further details and drawings visit the 'Tools and Documents' section at Marvin.com.

MULTIPLE ASSEMBLIES

Multiple assemblies can be factory mullied.

MAXIMUM ROUGH OPENING not to exceed 113 1/2" x 76 1/4" Maximum up to 5 units wide by 1 unit high.

MAXIMUM ROUGH OPENING not to exceed 84" x 92" Maximum up to 3 units wide by 5 units high.

Field mull kits are available. Structural mullion reinforcement is required for some assemblies.

Please consult your local Marvin representative for more information.

Details and Elevations not to scale.

Special sized units available within and outside of CN matrix. Please contact your Marvin dealer.

Minimum frame size: 17 1/2" x 27 3/4"

Maximum frame size: 53 1/2" x 83 3/4"

Optional Double Hung GBGs and SDLs are available in a standard Rectangular cut shown. Other available lite cuts shown on page 3.

When ordering 6 9/16" (167 mm) or 6 13/16" (173 mm) jambs, add 1/4" (6 mm) to width and 1/8" (3 mm) to height for Rough Opening, Frame Size and Masonry Opening.

E = These windows meet National Egress Codes for fire evacuation. Local codes may differ.

Available in equal, cottage, and reverse cottage sash configurations. Cottage and reverse cottage sash configurations are not available below CN 36 height and above CN 68 height.

For further details and drawings visit the 'Tools and Documents' section at Marvin.com.

MULTIPLE ASSEMBLIES

Multiple assemblies can be factory mullled.

MAXIMUM ROUGH OPENING not to exceed 113 1/2" x 76 1/4"

Maximum up to 5 units wide by 1 unit high.

MAXIMUM ROUGH OPENING not to exceed 84" x 92"

Maximum up to 3 units wide by 5 units high.

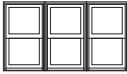

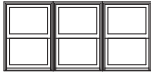

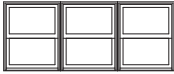

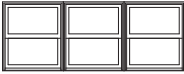

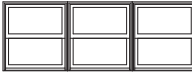

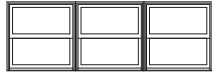

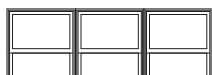

Field mull kits are available. Structural mullion reinforcement is required for some assemblies.

Please consult your local Marvin representative for more information.

Manual "Fresh Air" Curb-Mounted Skylight

As a venting skylight, the Manual "Fresh Air" Curb-Mounted Skylight opens for maximum daylight and fresh air to contribute to your home's proper moisture balance and comfort level. Your installer will build a curb on the roof which holds the skylight and ensures leak-free protection from rain and snow. It can easily open and close with a control rod when installed out-of-reach or with a smooth turning handle for those installed within reach.

Ideal Applications:
In reach and that can greatly benefit from natural ventilation.

FEATURES & BENEFITS

- Easily open and close skylight by hand with a smooth turning handle for in-reach applications or a rod for out-of-reach ones
- Equipped with insect screen to prevent pests
- Seamlessly pairs with any VELUX solar shades for optimal light control — select shades can be pre-installed for free
- Flashing kit required for
- Eligible for Federal Solar Tax Credit* with the addition of Solar Shades

PRODUCT DETAILS

- **Laminated LoE3 Glass:** double-paned argon-gas-filled LoE3 glass that provides excellent energy performance for year round comfort. Plus, it includes the added safety of laminated glass, which building codes require for out-of-reach applications.
- - 10-year installation warranty, plus 20 years on glass, 10 years on product, and 5 years on shades and controls.
- Insect Screen
- 10 year hail with Clean, Quiet & Safe glass

OPTIONAL SKYLIGHT UPGRADES

- Impact Glass
- Snowload Glass
- White Laminated Glass

ACCESSORIES

- Factory pre-installed Room-Darkening or Light Filtering shades
- Telescopic Rod 3'-6' or 6'-10'
- Crank Handle

*For more information visit veluxusa.com/taxcredit.

STORM & SCREEN DOORS

**MAKE AN ENTRANCE —
STYLE, FUNCTION, DURABILITY**

THE ANDERSEN DIFFERENCE

QUALITY HARDWARE

Customize your storm door with a variety of hardware options. Select a finish and style that complements the look of your home.

SPLINELOC® INSECT SCREEN

Has 3X more holding strength than our standard insect screen and a minimal center mullion bar for maximum durability.*

QUICK CHANGE

Change from insect screen to full glass panel **in less than a minute** with a simple flip of the handle.

RETRACTABLE INSECT SCREEN

Enjoy convenient anytime ventilation with a retractable insect screen that rolls into the door frame and out of view when not in use.

SMOOTHCONTROL PLUS™ CLOSE SYSTEM

Our built-in dual close system is 50% stronger than standard dual closers.** It has an advanced two part operation for a smoother close motion and a more consistent latch.

REINFORCED CORNERS

Built-to-last† construction featuring reinforced metal corner brackets helps the door corners stay square over time for long-lasting smooth operation.

TIME-SAVING INSTALLATIONS

Andersen has taken the hassle out of installing a storm door. Install with confidence with our easy and convenient installation systems.

See page 16 for details.

A STYLE FOR EVERY HOME

FULLVIEW INTERCHANGEABLE

Let in the maximum amount of light and air while beautifully framing your entryway.

See pages 4-7.

FULLVIEW RETRACTABLE

Let in an abundance of light while benefiting from convenient, anytime ventilation without removing a glass panel.

See pages 8-11.

¾ LIGHT PANEL VENTILATING

Enhance your entryway with a classic look at an exceptional value with a solid, lower embossed panel.

See pages 12-14.

½ LIGHT PANEL VENTILATING

The ½ light panel offers traditional style with a solid, lower embossed panel.

See pages 12-14.

LUMINAIRE® RETRACTABLE SCREEN DOOR

SlideAway® insect screen system designed to disappear when not in use.

See page 15.

*Visit andersenwindows.com/warranty for details. For demonstration purposes only, do not do this at home.

**Consistent complete door closure when compared to standard pneumatic dual closers.

† Visit andersenwindows.com/warranty for details.

10 SERIES FULLVIEW INTERCHANGEABLE

Ventilation

Our Innovative Quick Change System allows you to go from full ventilation with our SpineLoc® Insect Screen to full glass in less than a minute with a simple flip of the handle.

Carefully store the panel when not in use.

Operation

For advanced operation, this door includes our new SmoothControl Plus™ Close System. The built-in dual closer system allows for more consistent latching and a smoother close motion. It also has an easy-to-use hold-open feature and simple close speed adjustment.

- 50% stronger than standard dual closers*
- Commercial-grade steel closer arm
- More consistent latch
- Easy to use hold-open feature
- Simple close speed adjustment

*Consistent complete door closure when compared to standard pneumatic dual closers.

Security

Built-in keyed deadbolt for added security.

Choose laminated glass for added security. Doors with laminated glass include a 3-point lock built into the top, middle and bottom of the frame and shatter-resistant laminated glass.

Note: Doors with laminated glass are not compatible with an insect screen.

Glass Options

- Clear Glass
- Low-E Clear Glass
- Low-E Insulating Glass
- Laminated

Performance

Thick aluminum frame (1 1/2") with reinforced corners helps the door stay square over time for long-lasting smooth operation.

Premium double-layer weatherstrip provides added energy efficiency.

SmoothControl Plus™ close system performed better in wind durability testing.

Installation

See page 16 for details.

INSTALLATION SYSTEMS

We're taking the hassle out of installing a storm door, so there's no second-guessing. Just a job well done the first time.

RAPID INSTALL 1

RAPID INSTALL 1

Our Rapid Install 1 door system is the easiest installation option available in the market today. It was designed with the DIY audience in mind. We prehang the door so there is no cutting, minimal drilling and virtually no measuring required. We cut the Z-bars to length, assemble them on the door and drill the handle holes so you don't have to. Simply take the door out of the package and set it in the opening. The entire install takes less than an hour.

RAPID INSTALL 2

RAPID INSTALL 2

Our Rapid Install 2 door system offers a universally handed option. It was designed with the DIY audience in mind. We provide an unassembled door with Z-bars cut to length to save time on the installation. The process takes less than two hours, and no cutting is required.*

PRO INSTALL P

PRO INSTALL

Our Pro Install door system was designed with the professional installer in mind. We provide an unassembled door with a Z-bar of 81" that can be cut to length. An adjustable U-channel sweep makes necessary adjustments easy once the door is installed. The handle holes are predrilled to save time on the job and our twist-to-lock hardware installation makes for a quality, easy install.

*Actual tools required will vary between storm door models. See installation guide for details.

MEASURING GUIDE

1 Check to ensure door opening and trim allow enough space for a storm door.

DIMENSION A:

Minimum 3/4" width flat trim surface required

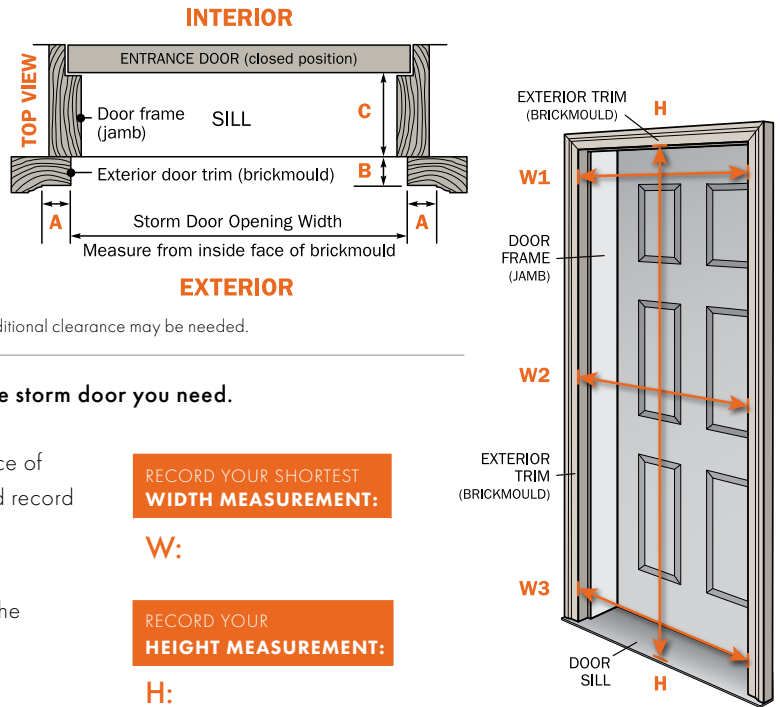

DIMENSION B:

Minimum 1" trim (brickmould) depth required

DIMENSION C:

Minimum of 2 1/2" door frame (jamb) depth required*

*Depending on the depth and location of your entry door handle set, additional clearance may be needed.

2 Measure door opening in order to determine the size storm door you need.

Measure the width of the door opening at the inside face of exterior trim on each side at top, center and bottom and record the shortest measurement.

(See measure points W1, W2 & W3 in the illustration at right)

Measure for the height from the sill to the underside of the brickmould at the top.

(See measure point H in the illustration at right)

RECORD YOUR SHORTEST WIDTH MEASUREMENT:

W:

RECORD YOUR HEIGHT MEASUREMENT:

H:

3 Determine the size you need based on the door opening measurements and the storm door model that is selected.

America's #1-selling shingle just got better — again

Now featuring a 25-Year Limited Warranty against
blue-green algae discoloration*

Now with GAF Time-Release Algae-Fighting
Technology and LayerLock™ Technology,
Timberline HDZ[®] offers everything
you can expect from an architectural
shingle roof, and more.*

* See reverse for details

We protect what matters most™

Timberline HDZ[®] Shingles

Benefits:

- **LayerLock™ Technology** mechanically fuses the common bond between overlapping shingle layers.
- The added strength at the common bond powers the **StrikeZone™** — The industry's widest nailing area.
- **Up to 99.9% nailing accuracy** — The StrikeZone™ nailing area is so easy to hit that a roofer placed 999 out of 1,000 nails correctly in our test.³
- **Up to 30% faster nail fastening** thanks to the industry's largest nail zone.³
- **Dura Grip™** sealant pairs with the smooth microgranule surface of the StrikeZone™ nailing area for fast tack. Then, an asphalt-to asphalt monolithic bond cures for durability, strength, and exceptional wind uplift performance.
- **WindProven™ Limited Wind Warranty²** — When installed with the required combination of GAF Accessories, Timberline HDZ[®] Shingles are eligible for an industry first: a wind warranty with no maximum wind speed limitation.
- **25-year StainGuard Plus™ Algae Protection Limited Warranty** against blue-green algae discoloration.¹ Proprietary GAF Time-Release Algae-Fighting Technology helps protect shingles from unsightly stains.

Installation:

The StrikeZone™ Nailing Area

The industry's largest nailing area for up to 99.9% nail placement accuracy.²

LayerLock™ Technology

Proprietary technology mechanically fuses the common bond between overlapping shingle layers.

DEEP DIMENSION OUTSTANDING PERFORMANCE

Duration® Shingles offer:

- The high-performance of SureNail® Technology
- A TruDefinition® Color Platform
- A Limited Lifetime Warranty*† for as long as you own your home
- The protection of a 130-MPH* wind warranty
- StreakGuard® Protection with a 25-year Algae Resistance Limited Warranty^{3/8}
- Rated Class 3 for Impact Resistance⁶ and may qualify for a homeowner insurance discount⁷

UNA NUEVA DIMENSIÓN DESEMPEÑO SOBRESALIENTE

Las tejas Duration® ofrecen:

- El gran desempeño de la tecnología SureNail®
- La gama de colores TruDefinition®
- Una garantía limitada de por vida*† mientras sea propietario de la vivienda
- La protección de una garantía contra vientos de hasta 210 km/h (130 mph)*
- Protección StreakGuard® con una garantía limitada de 25 años de resistencia a las algas ^{3/8}
- Clasificación nominal 3 para resistencia a los impactos⁶ y puede ser aplicable a descuento por seguro del propietario⁷

Don't let black streaks lower the value or curb appeal of your home.

Owens Corning blends specialized copper-lined granules, developed by 3M, a leading producer of roofing granules, into our colorful shingles. This helps resist blue-green algae growth.

No deje que las manchas de algas afecten al valor o aspecto de su vivienda.

En sus coloridas tejas, Owens Corning añade gránulos especiales con recubrimiento de cobre, desarrollados por 3M, un productor líder de gránulos para techos. Esto ayuda a prevenir la proliferación de algas azul-verdosas.

THE FINISHING TOUCH

OWENS CORNING® HIP & RIDGE SHINGLES

Owens Corning® Hip & Ridge Shingles are uniquely color matched to TruDefinition® Duration® Shingles. The multiple color blends are only available from Owens Corning Roofing and offer a finished look for the roof.

COLOR DISCLAIMER

As color experts, we know getting the shingle color right is a big part of any roofing purchase. Due to printing color variations, in addition to viewing shingle literature, we suggest you request an actual shingle sample to see how it will appear on your home and with your home's exterior elements in various natural lighting conditions. Lastly, we recommend you verify your color choice by seeing it installed on an actual home; your roofing contractor or supplier can provide a sample and may be able to direct you to a local installation.

DESCARGO DE RESPONSABILIDAD SOBRE LOS COLORES

En tanto que especialistas en color, sabemos que obtener el color de teja perfecto es una parte importante en toda compra de techos. Debido a las variaciones en los colores impresos, además de mirar folletos de tejas, le sugerimos que solicite una muestra de la teja para ver como se verá en su hogar y con los elementos externos de la vivienda bajo distintas condiciones de luz natural. Finalmente, le recomendamos que para verificar su elección de colores, vea cómo lucen las tejas ya instaladas en una vivienda; su contratista de techos o su proveedor le pueden dar una muestra e incluso indicarle dónde ver un techo ya instalado.

THERE'S A LINE BETWEEN A GOOD SHINGLE AND A GREAT SHINGLE.®

It's the nailing line on your shingles. The difference between a good shingle and a great shingle is having Patented SureNail® Technology, only from Owens Corning.

HAY UNA GRAN DIFERENCIA ENTRE UNA BUENA TEJA Y UNA TEJA EXCELENTE™

Es la línea de clavado en su tejas. La diferencia entre una buena teja y una teja excelente es la tecnología patentada SureNail®, una exclusividad de Owens Corning.

Excellent Adhesive Power

Helps keep the shingle layers laminated.

Excelente poder adhesivo

Ayuda a conservar el laminado de las capas de las tejas.

Outstanding Grip

The SureNail® strip enhances the already amazing grip of our proprietary Tru-Bond®** sealant for exceptional wind resistance of a 130-MPH wind warranty.

Agarre excepcional

La banda SureNail® mejora el excelente agarre de nuestro sellador patentado Tru-Bond®** con una garantía de resistencia al viento excepcional de 210 km/h (130 mph).

Breakthrough Design

Patented SureNail® Technology is the first and only reinforced nailing zone on the face of the shingle.

Diseño innovador

La tecnología patentada SureNail® es la primera y la única que provee un área de clavado reforzada en la cara de la teja.

"No Guess" Wide Nailing Zone

This tough, engineered woven-fabric strip is embedded in the shingle to create an easy-to-see, strong, durable fastener zone.

Área de clavado ancha, sin cálculos "a ojo"

Esta banda resistente de tela mecánica tejida está incrustada en la teja para proveer un área de sujeción resistente, duradera y fácil de detectar.

Triple Layer Protection®*

A unique "triple layer" of reinforcement occurs when the fabric overlays the two shingle layers, providing increased protection against "nail pull" from the wind.

Triple Layer Protection®*

Cuando la tela cubre las dos capas de la teja, se forma una "triple capa" de refuerzo excepcional que ofrece una mayor protección ante el "arranque de clavos" debido al viento.

Double the Common Bond

SureNail® features up to a 200% wider bond between the shingle layers in the nailing zone over standard shingles.

Duplica la adherencia común

En comparación con las tejas comunes, SureNail® ofrece un área de unión hasta un 200 % más ancha entre las capas de la teja en el área de clavado.

REGISTER YOUR WARRANTY

Registering your Owens Corning® warranty ensures it's easily referenced should you ever need to access it. The process is easy—just have your installation date, shingle type, shingle color and number of squares ready. Then go online to www.owenscorning.com/roofingstandardwarranty or call 1-800-ROOFING (1-800-766-3464) to finish the process.

REGISTRE SU GARANTÍA

Al registrar su garantía de Owens Corning® la podrá consultar rápidamente si fuera necesario acceder a ella. El proceso es simple: tenga a mano la fecha de instalación, el tipo y color de tejas y la cantidad de cuadrados. Luego, visite www.owenscorning.com/roofingstandardwarranty o llame al 1-800-ROOFING (1-800-766-3464) para completar el proceso.

* See actual warranty for complete details, limitations and requirements.

† 40-Year Limited Warranty on commercial projects.

‡ Owens Corning testing against competing products with wide, single-layer nailing zones when following manufacturers' installation instructions and nailing in the middle of the allowable nailing zone.

** Tru-Bond® is a proprietary premium weathering-grade asphalt sealant that is blended by Owens Corning Roofing® and Asphalt, LLC.

+ The amount of Triple Layer Protection® may vary on shingle-to-shingle basis.

International Code Council Evaluation Services Acceptance Criteria for Alternative Asphalt Shingles.

^ Excludes non-Owens Corning® roofing products such as flashing, fasteners, pipe boots and wood decking.

1 See Color Disclaimer information on page 3 for additional details.

2 Applies to all areas that recognize Miami-Dade Notice of Acceptance (NOA).

3 Shingles are algae resistant to control the growth of algae and discoloration.

§ Installation must include use of an Owens Corning® Hip & Ridge product. See actual warranty for details.

5 Owens Corning® Bourbon and Midnight Plum shingles include a patent pending design.

6 Qualifying Owens Corning Hip & Ridge Shingles may be required to complete a UL 2218 and/or FM 4473 Class 3 Impact-Resistant Roof System. Due to the variability in real storm conditions, a Class Rating on any product does not guarantee that it will withstand damage from hailstorms or other acts of God. Owens Corning shingles are not covered under a warranty for hail damage.

7 Homeowners should check with their insurance company to see if they qualify.

SureNail® Technology is not a guarantee of performance in all weather conditions.

For patent information, please visit owenscorning.com/patents.

* Consulte la garantía para obtener una lista completa de detalles, limitaciones y requisitos.

† Garantía limitada de 40 años para proyectos comerciales.

‡ Ensayos comparativos de Owens Corning con productos de la competencia con zonas de clavado ancho de una sola capa cuando se siguen las instrucciones de instalación del fabricante y se clava en el medio de la zona de clavado permitida.

** Tru-Bond® es un sellador asfáltico patentado de calidad premium formulado por Owens Corning Roofing® and Asphalt, LLC.

+ La cantidad de Triple Layer Protection® puede variar entre una teja y otra.

Criterios de aceptación de los servicios de evaluación del Consejo Internacional de Códigos para tejas asfálticas alternativas.

^ Se excluyen productos para techos no fabricados por Owens Corning®, como tapajuntas, sujetadores, bases de tubos y estructuras de soporte de madera.

1 Para obtener más información, consulte el Descargo de responsabilidad sobre los colores, en la página 3.

2 Aplicable a todas las zonas que reconocen el Aviso de aceptación (NOA, Notice of Acceptance) del condado de Miami Dade.

3 Las tejas son resistentes a las algas para controlar su desarrollo y la decoloración.

§ La instalación debe incluir el uso de un producto para limatesa y cumbre de Owens Corning®.

5 Las tejas de Owens Corning® Bourbon y Midnight Plum incluye un diseño con patente pendiente.

6 Es posible que se requiera el uso de tejas aptas para limatesa y cumbre de Owens Corning para completar un sistema de techo resistente a impactos UL 2218 y/o FM 4473 Clase 3. Debido a la variación de las condiciones de tormenta real, una calificación de clase en cualquier producto no garantiza que soportará daños por tormentas de granizo u otros casos fortuitos. Las tejas de Owens Corning no están cubiertas por una garantía por daños de granizo.

7 Los propietarios deben verificar con su aseguradora para saber si califican.

La tecnología SureNail® no es una garantía de desempeño en todos los tipos de condiciones climáticas.

APPROVED FIBER CEMENT SUBSTITUTE FOR WOOD SIDING IN HISTORIC DISTRICTS

Historic Preservation Guidelines for Substitute Materials

The National Park Service and Secretary of the Interior through Preservation Brief 16 (revised as of *September 2023*), allow for the use of fiber cement as a substitute material on properties designated as historic and buildings in historic districts in the following circumstances:

1. Unavailability of historic materials
2. Unavailability of skilled artisans or historic craft techniques
3. Inadequate durability of original materials
4. Replacing of a secondary feature
5. New additions
6. Reconstruction of missing feature
7. Code-required performance (fire code as an example)
8. Enhanced resiliency and sustainability
9. Affordability
10. Maintenance costs, including life cycle expenses

Fiber Cement Meets Criteria for Substitute Materials vs. Wood Siding

In September 2023, the National Park Service updated 1980s-era Preservation Brief 16: The Use of Substitute Materials on Historic Building Exteriors, to better assist preservation professionals evaluating the approval of substitute materials.

Updated Brief 16 provides useful criteria for approving building materials as substitute materials in the context of practical historic preservation, disaster resiliency, climate change, and housing affordability.

Hardie® fiber cement siding and trim meet the criteria in Preservation Brief 16 as an approved substitute material, offering a durable, resilient and affordable product for your preservation project.

Preservation Brief 16 criteria	Hardie® Fiber Cement Cladding
Appearance	<ul style="list-style-type: none">• Matches most wood siding and trim profiles• Smooth and woodgrain textures• 15-year warranty ColorPlus® Technology factory finish or factory primed for custom painting
Affordability	<ul style="list-style-type: none">• Best value vs. wood• Potential reduced insurance premiums• Lower maintenance costs
Installation/ Artisan Skills	<ul style="list-style-type: none">• Same installation skills as wood siding
Material Durability	<ul style="list-style-type: none">• Engineered for Climate® to better resist warping, swelling and cracking from moisture• Will not be damaged by insects or rot• Noncombustible* - will not burn or spread fire• 30-year non-prorated product warranty
Code Compliance	Meets requirements for: <ul style="list-style-type: none">• Florida High Velocity Hurricane Zones• California State Fire Marshall - Wildland Urban Interface Zones
Resiliency & Sustainability	<ul style="list-style-type: none">• FEMA Class 5 - High flood damage resistant• HUD recommends fiber cement cladding for upgrading home resiliency vs. fire, flood and storm damage• Lower embodied carbon than engineered wood siding

*Hardie® fiber cement products are non-combustible and have a Class A fire rating when tested in accordance with ASTM E84.

Local Historic Districts Accept Fiber Cement

Locality	Renovation	New construction
Chicago. IL	Yes	Yes
New York City, NY	Yes	Yes
Charlotte, NC	Yes	Yes
Memphis, TN	Rear elevations	Rear elevations
Jacksonville, FL	Rear Elevations	Rear Elevations
Austin , TX	Yes	Yes
Charleston, SC	Yes	Yes

- ✓ On restoring historic buildings with fiber cement in historic district in **Medfield, MA:** <https://youtu.be/H5s3HFL5gsw>
- ✓ On using alternative materials in Historic Districts by **Columbus, OH:** “...*cementitious siding has been widely adopted and accepted in historic districts for new infill and outbuilding construction. If a property’s original wood siding has deteriorated some cities allow the installation of this material on primary elevations.*”¹

¹[Alternative Materials and Their Use in Historic Districts Prepared for the Historic Preservation Office City of Columbus, Ohio Planning Division](#)

Case Study: Washington D.C.

Washington, DC Historic District Approves Fiber Cement Siding

Historic District in Washington, D.C. approved installation of fiber cement siding as a substitute for wood due to:

- ✓ **Aesthetics** – “only a “highly trained eye” could spot the difference between fiber cement and wood”
- ✓ **Durability and resiliency** of fiber cement compared to wood
- ✓ **Affordability** of fiber cement versus wood
- ✓ **Neighborhood support** - installation of fiber cement on other homes in neighborhood and support from neighbors and neighborhood associations

Aesthetics – Approval of Fiber Cement v. Wood JamesHardie™

Hardie® siding is chosen by homeowners as a replacement for wood due to its aesthetics and looks

- ✓ Only a highly trained eye can spot the difference between Hardie and wood (A/B comparison image)
- ✓ The contractor presented two models comparing conforming wood siding with Hardie siding painted with the same paint. The Hearing Officer could **perceive no difference in appearance between the wood and Hardie siding.** The Applicants' witnesses also testified that no difference could be perceived from the public way.
- ✓ A representative of Hardie testified about the increasing acceptance of the product by numerous other historic jurisdictions including the Park Service and the DC Commission on Fine Arts.

Conclusion – Precedent for Fiber Cement Installation in Historic Districts

- 1. NPS Preservation Brief 16 allows for installation of fiber cement siding in substitute for original siding materials.** The revised brief allows for consideration of factors that favor fiber cement – affordability, durability, resiliency, aesthetics and sustainability.
- 2. Local precedent in historic districts that allow for installation of fiber cement siding in substitute for original siding materials** for reasons that include durability, aesthetics, affordability, resiliency and sustainability.
- 3. Fiber cement siding is identical or superior to wood and original materials in aesthetics, durability, resiliency and affordability.**
 - *Note: “Hardie® siding is designed to look like wood, particularly when painted. It has significant advantages over wood: it is far more durable (with a 30-year warranty), is more water-resistant, is noncombustible, and is much, much cheaper. Wood, as it happens, is no longer your parents’ wood.”*

- In the Matter of 528 4th Street, SE, HPA No. 22-145, November 4, 2022, page 4

MAGNOLIA HOME

Hardie® Shingle Straight Edge Panel
It's About Thyme

“CHIP AND I WERE REALLY EXCITED TO COLLABORATE WITH JAMES HARDIE. OUR AIM IS ALWAYS TO NOT ONLY GIVE CLIENTS A BEAUTIFUL HOME, BUT ONE THAT WILL STAND THE TEST OF TIME.

— Joanna & Chip Gaines

introducing the

MAGNOLIA HOME | JAMES HARDIE COLLECTION

We've partnered with Magnolia Home to create an inspired collection of exteriors in colors, styles and textures curated by Joanna Gaines to transform your home into your favorite place to be. This collection was created to help simplify the process of re-siding your home, so you can design with confidence. You'll have added peace of mind knowing your project is backed by the trusted protection and long-lasting beauty of the recognized leader in exterior siding, James Hardie.

EVERY HOME TELLS A STORY

When it comes to design, Joanna's favorite style is anything that's beautiful and timeless and tells a unique story. That's what made the idea of partnering with James Hardie so easy. With the beautiful, nature-inspired colors and styles of Hardie® siding and trim curated for this collection, Jo created an inspiring palette of possibilities. She's made it easy for homeowners to choose what they want for their exterior transformation.

The Magnolia Home | James Hardie Collection can help you create an exterior you love.

“WHEN PEOPLE TELL THEIR OWN STORY RATHER THAN FEELING PRESSURE TO FIT WITHIN A SPECIFIC STYLE, THERE'S MORE FREEDOM - AND THEIR SPACE BEGINS TO FEEL LIKE HOME.”

— Joanna Gaines

A finished look starts with beautiful trim.

Hardie® Trim

Form meets function at every intersection with Hardie® Trim boards. With an authentic look, Hardie® Trim boards provide design flexibility for columns, friezes, doors, windows and other accent areas.

With higher performance to withstand damage from the elements compared to wood trim, Hardie® Trim is the perfect option for a long-lasting home. Hardie® Trim is a low-maintenance and durable accent for your exterior — adding an extra component of beauty to your home.

Protection in every detail, complete confidence in every area.

Hardie® Soffit

Every part of your home's exterior matters. With Hardie® Soffit panels, you can live confidently, knowing that gaps between eaves and exterior walls are covered to provide trusted protection.

DID YOU KNOW?

Using vented soffit improves ventilation and reduces the chance of water-vapor condensation that can promote mold, mildew and stains and which can damage your home's framing over time.

In warm climates, vented soffit allows hot, humid air to escape, which not only helps prevent condensation in the attic, but also helps reduce air-conditioning costs.

In cool climates, vented soffit helps prevent condensation from forming on the interior side of the roof sheathing and reduces the chances of roof-damaging ice dams.

**Durability
you can trust.**

**Protection
you can feel.**

Tougher than the elements.

Fire

A home's exterior is its first line of defense against extreme weather and fire. Prepare your home for the unpredictable with siding that is non-combustible, won't burn and is recognized by fire departments nationwide.*

- Listed for use in wildfire-prone Wilderness Urban Interface (WUI) zones in the western US.

Cal-Fire Compliant

Fiber Cement Siding

*Hardie® siding complies with ASTM E136 as a noncombustible cladding and is recognized by fire departments across the U.S. including Marietta, GA, Flagstaff, AZ and Orange County, CA. Fiber cement fire resistance does not extend to applied paints or coatings, which may be damaged or char when exposed to flames.

Pests

Mother Nature's creatures can wreak havoc on wood-based siding. It can be pecked by birds or damaged by termites or other pests. Hardie® fiber cement holds no appeal for these critters, saving you the maintenance hassle.

Mother Nature

Your siding is exposed to Mother Nature all day, every day. You deserve to feel confident that it can hold its own throughout it all — from the changing seasons to extreme weather.

- FEMA Class 5 flood damage resistance (highest rating)
- Rated for use in High Velocity Hurricane zones by Miami-Dade County, Florida

Water Resistant

From rain to ice to snow, Mother Nature's precipitation patterns leave wood exteriors at risk to cracking, swelling and warping. Take shelter from the storm knowing that your siding is built to resist water damage.

Time

ColorPlus® Technology finishes provide a durable finish that helps resist fading and discoloration that other paint applications may see more quickly over time, so your exterior can keep its good looks longer.

Exterior solutions inspired by nature and designed to help protect your home from it.

Hardie™ Zone System

Only Hardie® fiber cement exterior products are Engineered for Climate®, designed specifically with your climate zone in mind for optimal performance. In the northern USA and Canada, HZ5® products resist shrinking, swelling and cracking in wet or freezing conditions. HZ10® products help protect homes from hot, humid conditions, blistering sun and more.

With Hardie® siding and trim, your home's exterior will be as tough as it is beautiful.

The highest-quality materials for your highest satisfaction.

Unique Formulation HZ5® Substrate

Not all fiber cement is the same. The Hardie® HZ5® product formulation contains the highest-quality raw materials. Our unique formulation, combined with innovative product design and manufacturing processes, creates a substrate that is specifically engineered to resist moisture, cracking, shrinking and swelling, for increased durability and workability.

Proprietary enhancements create durable Hardie® siding

Perfect balance of strength and workability

Our balance of high-quality Portland cement, sand and cellulose fiber delivers the best combination of strength and workability.

Enhanced moisture resistance for unmatched durability

Patented and proprietary additives are chemically bonded within the HZ5® substrate matrix to provide durable moisture resistance. In addition, Hardie® Plank in HZ5® substrates come with a drip edge to provide improved water management.

Increased dimensional stability

Our siding is engineered at the microscopic level to create a fiber cement composite with superior dimensional stability that helps protect against shrinking and splitting.

Made in the USA

● James Hardie Manufacturing Plant

10 manufacturing facilities in the United States which source 80% of their raw materials locally

Unmatched investment in manufacturing scale and production innovation

- Largest manufacturer of fiber cement in North America
- Over 7x the North American manufacturing capacity of our nearest fiber cement competitors
- More than 100 process and product quality checks
- Over 95 scientists and engineers in R&D providing dedicated resources for continuous innovation in manufacturing and product development
- More U.S. fiber cement patents than any competitor

Building sustainable communities.

Sustainability is built into our DNA.

At James Hardie, our business is about building better communities that have a lower impact on our environment and are built to last. We operate with a global mindset and at the same time take great care in how our business affects households, our James Hardie community, the local communities in which we live and operate, and across the largest shared community of all, our global ecosystem. Building sustainable communities is at the forefront of our strategy and integral to our success.

Adding value to our communities

We recognize our ability to impact the communities in which we live and work. While maintaining a global mindset, we put great care into how our business affects local communities. We contribute by sourcing, employing, delivering and giving locally.

Creating an impact

We invest in the local community and aim to locate the plants close to suppliers, customers and potential new employees, as well as sustainable transportation opportunities.

*Above statistics are the James Hardie impact from fiscal year 2022.

The right kind of impact

Having a sustainable impact means minimizing our impact on the environment while supporting resilient local communities. We are committed to minimizing our environmental impact, prioritizing the management of waste, water, energy and emissions.

2030 goals

**Long-lasting
beauty by
design.**

Beauty begins with a finish that lasts.

Hardie® Plank Select Cedarmill® Aged Pewter

Hardie® Trim Smooth Arctic White

ColorPlus® Technology

ColorPlus® Technology finishes are fully cured on our boards in a controlled factory environment and arrive at your home ready for installation year-round. With prefinished color products, you'll have peace of mind, knowing you'll have a more consistent color and finish that doesn't depend on good weather.

With over 700 colors available, ColorPlus® Technology finishes offer endless design possibilities and help keep your home looking beautiful longer.

Finishing Technology

Primer

A quality primer is the first step to ensuring that the paint color you select expresses your home's true beauty now – and for years to come. Our distinctive primer is climate tested and engineered to enhance the performance of paint on Hardie® fiber cement exterior solutions. It helps to provide consistent, long-lasting paint adhesion, even in the most demanding conditions.

ColorPlus® Technology

Our advanced ColorPlus® Technology finishes deliver the ultimate in aesthetics and performance. Our products aren't simply painted at the factory. Our proprietary coatings are baked onto the board, creating a vibrant, consistent finish that performs better, lasts longer and looks brighter on your home.

Exceptional finish adhesion

Our proprietary coatings are engineered for exceptional adhesion to our substrate and applied to the surface, edges and features for durable performance.

Superior color retention

The finish is cured onto boards for a stronger bond, which allows for exceptional resistance to cracking, peeling and chipping.

Superior UV resistance

ColorPlus® Technology finishes are engineered to retain vibrancy and reduce fade or discoloration from UV rays.

Unparalleled beauty with unparalleled performance.

See the James Hardie difference

James Hardie invented modern fiber cement. Trusted by homeowners on over 10 million homes*, we continue to set the standard in premium, high-performance exterior cladding. Our products deliver uncompromising durability and finish quality for a beautiful, lower maintenance exterior.

Our unrivaled investment in R&D and constant innovations in product design, manufacturing and distribution allow us to remain steps ahead of the competition. With the support of our employees and partners, and with our exceptional warranties, we're committed to helping protect your home and investment every step of the way.

*Estimate based on total James Hardie sales through 2022 and average housing unit size.

Warranty — for peace of mind

Help protect your home with North America's #1 brand of siding, backed by exceptional warranties. Unlike other brands, James Hardie doesn't prorate our siding and trim substrate warranty coverage. We stand 100% behind our siding for 30 years and our trim for 15 years.

- Hardie® siding and soffit products come with a 30-year non-prorated limited substrate warranty.
- Hardie® trim products come with a 15-year non-prorated limited substrate warranty.
- ColorPlus® Technology finishes come with a 15-year prorated limited finish warranty.

Non-Prorated Siding Substrate Warranty Coverage by James Hardie

Endorsements — a reputation built on trust

For decades, our fiber cement products have been used to create better places to live. Each new home stands as a testament to our uncompromising quality. That proven track record has earned us the loyalty of millions of homeowners and the endorsements of trusted authorities across the building industry.

FOR THE PROS

Protection that performs at every layer.

Hardie™ Weather Barrier

No exterior cladding can prevent 100% of water intrusion. Your home should have an additional line of defense. Hardie™ Weather Barrier provides a superior balance of water resistance and breathability, keeping the area within the wall drier. This helps prevent moisture accumulation that may lead to mold and mildew growth.

INSTALLATION ADVANTAGES

- Thicker, more durable material for easier, quicker installation
- Superior tear resistance helps prevent water infiltration
- Can be installed with staples in place of cap nails for cost savings
- Provides a higher level of performance, no matter what type of cladding you specify

Installation Done Right

INSTALLATION ACCESSORIES

Hardie™ Blade Saw Blades

Manufactured by Diablo, the Hardie™ Blade saw blade is designed specifically to cut fiber cement products and is the only saw blade James Hardie recommends. The blade creates clean, precise cuts while helping to reduce the amount of airborne dust produced.

PacTool® Gecko Gauge

The PacTool® Gecko Gauge is designed to improve the installation experience, allowing one person to hang Hardie® Plank lap siding during installation. Studies suggest the Gecko Gauge can improve the speed of solo installation by 30%.

Finishing Touches

COLORPLUS® TECHNOLOGY ACCESSORIES

Touch-Up Kits

Specially formulated to match ColorPlus® Technology finishes, our touch-up kits offer resistance to aging, color change and chalking. Estimated one kit per 4,000 sq ft of siding or 1,600 sq ft of trim.

Color-Matched Caulk

OSI® QUAD® MAX sealant offers a high-performance sealant solution to color match Statement Collection® products.* About 18–20 linear feet per tube. Refer to packaging for manufacturer's recommendations.

*For matching Dream Collection® products, contact your local James Hardie representative.

TRIM ACCESSORIES

Flat Tabs

Eliminate face nails and improve the aesthetic of trim applications around windows, doors and band boards.

Corner Tabs

Use corner tabs to eliminate face nail holes that would detract from the finished look of corner trim installations.
