ADDENDUM 1

RFP # 19-24

Engineering Services, Pease Wastewater Treatment Facility Rehabilitation

Questions submitted:

1. Scope of Services (SOS) does not indicate if the consultant Project Manager (PM) or the Value Engineering Team Leader (VETL) are required to licensed professional engineer (PE). Is a current PE license required for the PM and/or VETL?
2. Will the VE review workshop be conducted as virtual, in-person on site at Portsmouth, or as a hybrid virtual/in-person format event?
3. Approximately what is the timeframe for when this VE review workshop would be conducted?

Answers:

1. PE required for Project Manager (PM). PE preferred but not required for the Value Engineering Team Leader (VETL)
2. All VE participants attend in person.
 - a. Having everyone on-site allows for a site tour to understand current conditions and constraints to the rehab of the WWTF, avoids distractions during the VE working sessions, and is beneficial during the final presentation as the proponent for each VE recommendation can interact with the design team to better transfer the VE team concepts and thought process.

Within 30 days of executed contract. (Anticipated March)

The Proposer will acknowledge this addendum within your proposal. Failure to do so may subject proposal to disqualification.
