

## **Addendum**

### **Bid 23-25 Traffic Signal Replacement**

**Question 1:** There are no provisions in this contract for communications, a communications riser, fiber, or a cellular unit. How does the city plan to have the controller and other components remotely monitored?

**Answer:** The Miovision detection system includes built-in cellular for remote connection access. For any alternative to have a chance to be considered an approved equal to Miovision, a remote communications component will need to be one of the items included.

Please acknowledge this addendum within your proposal. Failure to do so may be subject to disqualification.
