

**ADDENDUM #1 ISSUED AUGUST 1, 2022**

**RFP # 04-23- Climate Action Plan**

**Clarification on Updated Emissions Forecasting Goal** – The City of Portsmouth is not asking for a greenhouse gas inventory for this plan, instead they are asking for a tool that would be a part of the post-plan toolset. This tool will take previous greenhouse gas inventories, current City and community business-as-usual scenarios, and any recent or planned GHG commitments and/or code changes to estimate future emissions scenarios.
