

City of Portsmouth Department of Public Works 680 Peverly Hill Road Portsmouth, New Hampshire 03801

# ADDENDUM NUMBER 1

## Bid #40-22

## 2022 Sidewalk Reconstruction on State Street

## Issued June 2, 2022

The addendum forms part of the original document marked: Bid #40-22 2022 Sidewalk Reconstruction on State Street. Acknowledge this addendum within your proposal. Failure to do so may subject bidder to disqualification.

The following questions have been asked and answered:

**Question 1:** Units for pay item 608.26 - 6" Concrete Sidewalk (ADA Ramps) is in Square Foot on the Bid Tab and Square Yard in the Specifications. Should they both be in Square Yard? **Answer:** The Bid Tab is correct, and the Specifications is incorrect. The quantity provided is based on Square Foot. Attached is a revision to the Specifications.

**Question 2:** Is there an engineer's estimate for the project?

**Answer:** Engineer's estimate is:

Base Bid - \$400,000 Add/Alt #1 - \$25,000 Add/Alt #2 - \$60,000

**Question 3:** The existing roadway and a few driveways have areas of ponding with multiple patches. Are there provisions for repairs to roadway gutter line and roadway surface repairs? **Answer:** The Engineer will work with the Contractor to establish detailed sidewalk and driveway grades, curb heights and positive pitch gutter lines to alleviate ponding issues. This may mean that curb reveals will vary when compared to the existing roadway grades. The City has a contract for roadway repairs, to include but not limited to, mill & overlay, reclaim, regrade, etc. that will follow this Sidewalk project.

## **Question 4:** The following Bid Tab concerns:

- A. Pay Item 201.3 Tree and Shrub Pruning is a Lump Sum item with a quantity of 0.25.
- B. At the end of the Bid Tab \* Estimated and/or Indeterminate Quantity, but there are no "\*" identifying which items this pertains to.

**Answer:** The Bid Tab has been revised and attached. Utilize the updated Bid Tab in your proposal.

- A. Pay Item 201.3 Quantity has been revised to 1.
- B. There are six items with quantities with an "\*".

End of Addendum #1.

#### SPECIAL PROVISION

#### SECTION 608

#### **SIDEWALKS**

#### **Amend** Section 608 to include:

#### **Description**

**Amend 1.1:** This work shall consist of constructing sidewalks of either hot bituminous pavement, Portland cement concrete, reinforced when specified, Brick, or Pavers. Portland cement concrete sidewalks shall receive a protective coating unless otherwise directed.

#### **Materials**

- **Amend 2.2:** Portland cement concrete shall be Class AA (4000 psi), 5%-7% air-entrained, 4-6 inch slump with poly-fiber reinforcing conforming to Section 520.
- **Add 2.6:** New bricks shall be manufactured by Pine Hall Brick and shall be Traditional edge, Pathway, Full Range. The bricks shall not be cored or have frogs and shall be of a standard size (2.25" x 4" x 8"). The Engineer will have 5 working days to approve the brick submittals before they are installed. It is the responsibility of the Contractor to provide suitable brick samples for approval.
- Add 2.6.4: Detectable warning surfaces for straight curb ramps shall consist of panels from Neenah Foundry, East Jordan Iron Works, or approved equal. Detectable warning surfaces for radius curb ramps shall consist of a combination of straight and wedge panels from Tuftile or approved equal. The units shall be cast into Portland cement or other owner approved material, as recommended by the manufacturer. The panels shall be of cast iron.
- **Add 2.6.5:** Straight curb ramps shall use panels with a minimum width of 24". Cutting of panels is prohibited. Radius curb ramps shall consist of a combination of straight and wedge panels matching the curvature of the curb ramp. Calculation of panel sizes, types and quantities shall be determined by the manufacturer. All panels shall be a minimum of 24" in depth and shall span the entire width of the ramp.

#### **Construction Requirements**

Amend 3.2.6.1: Construct transverse and longitudinal crack control joints by sawing, jointing tool or other approved method to a minimum depth of one third the slab thickness. If the jointing tool is not capable of constructing a joint to the correct depth, saw the joint to the correct depth. Saw crack control joints as soon as concrete has hardened sufficiently to permit sawing without excessive raveling and before uncontrolled shrinkage cracking occurs, usually between four and twenty four hours. Control joints for cracking shall be spaced at 5 ft., unless otherwise specified. Construct expansion joints at 25 ft. intervals. Bond breaker shall be used at all construction joints.

**Amend 3.3.3:** Install detectable warning devises and any anchoring hardware in accordance with manufacturer's instructions. Panel shall be set in a bed of 6" wet concrete.

#### Add 3.4: Brick and Paver Sidewalks

- **3.4.1:** Excavation for sidewalks shall be at a depth of 13 inches below finish grade. In areas not butting curbing or buildings, the excavation shall be 6 inches wider than the finished sidewalk width. At all drive crossings, the depth of excavation shall be increased accordingly. The Contractor's price shall include neat and square cutting of existing asphalt road surface as needed. All unsuitable material shall be removed and disposed of off-site at the Contractor's own expense.
- **3.4.2:** The base material for sidewalks shall consist of 304.3 crushed gravel or 306.212 rehandled reclaim base materials to a minimum depth of 8". Base material to extend past edge of sidewalk 6" in areas not adjacent to walls, curb or buildings.
- **3.4.3:** A 3/8" bituminous asphalt hot mix pavement shall be placed parallel to grade and compacted to a minimum thickness of 2". Asphalt base to be extended 6" in areas where edging is to be used. Bituminous pavement for sidewalk base is considered subsidiary to the brick sidewalk pay item.
- **3.4.4:** Place a 1:3 Portland cement / course sand mix on the asphalt base to a thickness of 1". Pavers to be dry laid on the mixture.
- **3.4.5:** The Contractor shall lay the bricks so that approximately 5.0 bricks shall cover one square foot (tight joints).
- **3.4.6:** The sidewalk shall pitch 1/4 inch per foot towards the street or as directed.
- **3.4.7:** In areas where the edge of the brick sidewalk is not adjacent to granite curbing or buildings, the Contractor shall install edging to hold the bricks in place. Such edging shall be installed per the manufacturer's recommendations and incidental to the pay item.
- **3.4.8:** In areas with a closed drainage system, the contractor shall provide "silt sacks" to prevent brick dust from entering the collection system. The area shall be swept daily to keep dust levels as low as possible.
- **3.4.9:** All half bricks needed for running bond work will be snapped if possible and all efforts will be made to keep brick dust to a minimum. All cuts not made by snapping will be wet cut.
- 3.4.10: All masonry shall be laid by skilled workmen under adequate supervision, and shall be laid true to lines and levels referred to in previous paragraphs. Masonry work shall not be laid in temperatures below 40 degrees Fahrenheit unless provisions are made to adequately protect the masonry materials and the finished work from frost. All masonry materials used in freezing weather shall be at a temperature between 50 degrees Fahrenheit and 90 degrees Fahrenheit. Protect masonry against freezing for a minimum of forty-eight (48) hours after being laid. Anti- freezing admixtures will not be allowed in the mortar. Frozen work shall not be built upon. Any completed work found to be affected by frost shall be taken apart and rebuilt at the Contractor's expense.

#### **Method of Measurement**

Amend 4.1: 4" Concrete sidewalks will be measured by the square yard to the nearest 0.1 square yard. 6" Concrete sidewalks will be measured by the square foot to the nearest 0.1 square foot. Brick sidewalks will be measured by the square yard to the nearest 1.0 square yard. The area occupied by the curb will not be included in the final pay quantity.

Add 4.3: ADA Detectable warning panels will be measured by the square foot installed.

## **Basis of Payment**

Amend 5.1: Sidewalks will be paid for at the Contract unit price per unit of each type, complete in place.

Add 5.4: ADA Detectable warning panels will paid for at the Contract unit price per square foot of panel installed.

Pay item		Pay unit
608.24	4" Concrete Sidewalks	Square Yard
608.26	6" Concrete Sidewalks (Accessible	<b>Square Foot</b>
	Ramps)	
608.54	ADA Detectable Warning Panels	Square Foot
608.5A	Brick Sidewalk (Edging)	Square Yard
608.5B	Brick Sidewalk (Full Width)	Square Yard
